# WHY SUNON BLINDS?

More than 25 years ago, Sunon was born, a company formed by experienced personnel focused on the sector, since January 1993, we stand out for the wide range of solutions that we can provide. Sunon has professional collaborators from various sectors, such as: architects, engineers, window manufacturers, curtain wall manufacturers, and builders who provide the right systems for the execution of the project; for this reason, the company is recognized as one of the best in the industry.

For the quality of their work. We ensure that in each project we eliminate any type of openings and gaps, in addition to providing a high design facade, comfortable, energy-saving, and environmentally friendly. We specialize in technical and adjustable shutter systems, with dynamic elements for residential sun protection, facades, security, and tunnel boxes, as well as motorization systems. We also take care of product manufacturing, distribution, and installation.

## ADJUSTABLE SHUTTER ALIKA

Sunon is present in all phases of the project. From advice to architects, to customized solutions for any type of renovation.

As a customer, through a virtual test, you can visualize the variety of options according to your project.

We will provide you with a technical and economic study where the total service will be provided, which includes: products, assembly, consulting and after-sales maintenance.

# ADJUSTABLE BLIND

Alika is an aluminium rolling shutter system with adjustable slats. It can be operated, both up and down, like a normal roller shutter. When fully lowered, Alika allows the gradual orientation of the slats to adjust the level of light and air entering the room. It has a simple and silent operation.

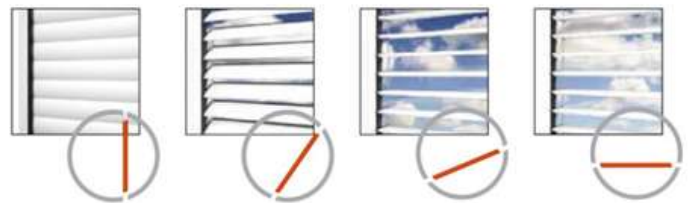

With Alika it is possible to create your own spaces, with maximum comfort, without sacrificing privacy. The use of Alika is simple and achievable for anyone. It can be operated with commercially available radio motors. Alika can be integrated into home automation systems, contributing to energy saving and passive security of the house.

## SISTEMA ORIENTABLE

It has a simple and silent operation. With Alika it is possible to create your own spaces, with maximum comfort, without sacrificing privacy. The use of Alika is simple and attainable for anyone. It can be operated with radio motors available on the market. Alika can be integrated into home automation systems, contributing to energy saving and passive security of the house.

- Approximate weight: 10.5 kg/m<sup>2</sup>
- Nominal thickness: 15.5 mm
- Slat height: 60 mm
- Maximum dimensions per panel: 200 x 280 cm (W x H)
- Complies with UNI EN 13659 standard:
- Wind resistance CLASS 6 / Mechanical resistance: CLASS 3
- Thermal Envelope: Improves the thermal envelope of the building by reducing the Shading Factor (Fs\*).
- \* Fs: According to Table 14 of the Supporting Document of DB-HE1 of the Technical Building Code.Edificación.

# QUALITY RAW MATERIALS

The whole process of quality of the products is checked, for this reason, Alika uses the best raw materials and the most advanced technology in the market. Aliko uses the best raw materials and the most advanced technology in the market.

## PATENTED SYSTEM

 Aliko is the first rolling shutter with adjustable slats that swivels from 0° to 90°.

## RELIABLE AND NOISE-FREE

 Aliko does not use complex mechanisms, the slats are oriented in a natural and automatic way, by their own force of inertia. Aliko's operation is smooth and noiseless.

## ENERGY SAVING

 Aliko helps reduce household energy costs.

## DESIGN

 Aliko pays special attention to the design of each component, offering a choice of colors for both profiles and components.

## COMFORT & PRIVACY

 The adjustable slat adjustment system guarantees maximum comfort and at the same time maximum privacy.

## ENVIRONMENT

 All Aliko components, both aluminum profiles, and PVC components are 100% recyclable.

Primary aluminium, stainless steel, and special plastics are the main materials that Aliko uses, therefore, it is 100% recyclable. Aliko is maintenance-free and is a certified product.

## SIMPLE AND EASY

 Aliko is easy to install and simple to use, just like a standard roller blind.

## DOMOTIC SYSTEMS

 Aliko can be integrated into any home automation system.

## LOW MAINTENANCE

 Aliko requires little maintenance. Cleaning is safe thanks to the rounded shapes and the protection of cuts and sharp edges.

## CE MARKED

 Aliko complies with UNI EN 13659 and is CE marked.

## INCREASED SECURITY

 Aliko is manufactured with reinforced aluminium profiles and stainless steel components, which contribute to increasing the passive safety of the house.

## PROVEN DESIGN

 Aliko won the "Archiproducts Design Awards 2017", which recognizes excellence in the field of design home.
