WHY SUNON BLINDS?

More than 25 years ago, Sunon was born, a company formed by experienced personnel focused on the sector, since January 1993, we stand out for the wide range of solutions that we can provide. Sunon has professional collaborators from various sectors, such as: architects, engineers, window manufacturers, curtain wall manufacturers, and builders who provide the right systems for the execution of the project; for this reason, the company is recognized as one of the best in the industry

for the quality of their work. We ensure that in each project we eliminate any type of openings and gaps, in addition to providing a high design facade, comfortable, energy-saving, and environmentally friendly. We specialize in technical and adjustable shutter systems, with dynamic elements for residential sun protection, facades, security, and tunnel boxes, as well as motorization systems. Likewise, we also take care of product manufacturing, distribution and installation.

ALIKA FLAT SUN PROTECTION SAFETY BLINDS

Sunon is present in all phases of the project. From advice to architects, to customized solutions for any type of renovation.

As a customer, through a virtual test, you can visualize the variety of options according to your project.

We will provide you with a technical and economic study where the total service will be provided, which includes: products, assembly, consulting and after-sales maintenance.

SECURITY BLINDS FOR ASIMETRIC SUN PROTECTION ORIENTABLR

INTRODUCTION:

The Asy-VE angled venetian blind is a venetian blind with a system of slats variable.

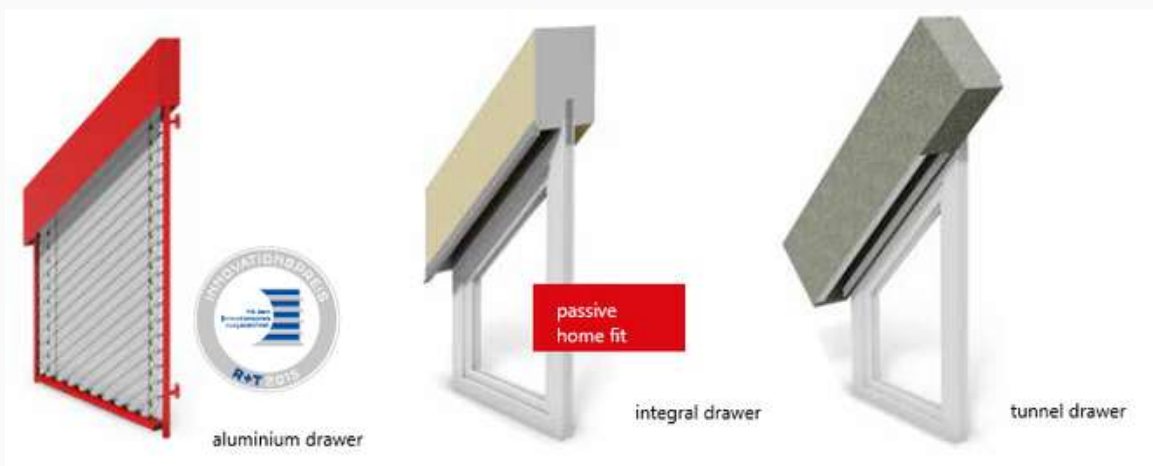

For operation, you can combine the standard electric motor with a control remote or a wall switch, it is also possible integration into your home solution intelligent through it.

The 80 mm blades allow a package of very low lamas and therefore hardly remove light when retracted.

As you move, the bottom rail of your blind AsyFlex external venetian fits automatically to the tilt. This ensures a clean workmanship and an optimal finish.

For integrated insulation, Sunon le offers the Combo AF suitable for homes as well as the AFV Combo for the integration into your front insulation.

Inclination	5-45°
Wide	591-2649mm
Height	180-3900mm

SECURITY BLINDS FOR ASIMETRIC SUN PROTECTION ROLLING

INTRODUCTION:

The inclined roller blind Asy-Ble completely new works as a conventional roller blind thanks to the patented nipple system. The curtain moves silently from top to bottom to close and darkens the whole width and height.

Installing the new Asy-Ble in a window or facade is as easy and fast as with any other roller blind. Asy-Ble is can be used as a single system, in combination with other roller blinds inclined or with straight roller blind.

Asy-Ble with photovoltaic system performs the geometry of the inclined roller blind by means of a wider guide rail, and so much, does not require any chiselling work during installation.

Asy-Ble with solar panel is completely self-sufficient thanks to the battery and the powerful motor.

SECURITY BLINDS FOR ASIMETRIC SUN PROTECTION ORIENTABLR

INTRODUCTION:

Tamiflex is available in almost all Shapes: With Tamiflex you can shade round windows and all forms of asymmetrical windows. Tamiflex is also suitable for skylights, ceiling windows shed and skylights of all shapes with an inclination of up to 90 °.

Slats with 80 mm wide flange are very sensitive to wind and weather and, thanks to its reversible function, they allow individual shading.

SECURITY BLINDS FOR ASIMETRIC SUN PROTECTION TAMIFLEX

INTRODUCTION:

The oblique shading Sunon shaped triangular and trapezoidal can be combined from the way you want on your facade, garden winter or loft, and in a way completely harmonious in terms of appearance and feel. Of course, Sunon also offers you venetian blinds horizontal exteriors or blinds rolls of the Asy-Ve and Asy-Ble series, which, with the shading inclined, form a perfectly harmonious unity in all aspects.

AsyFlex systems are equipped with slats flat 80 cm wide that are placed a on top of the other with almost no noise when retract. Low pile heights give as result thin panels that complement optimally any facade and leave plenty of room for light and air.

80's flanged slats, which provide privacy and sun protection in Tamiflex, have a special twist against the wind and the weather. The flange gives them a special stability so that the slats can withstand any kind of weather. You will enjoy your Tamiflex for many years.
