WHY SUNON BLINDS?

More than 25 years ago, Sunon was born, a company formed by experienced personnel focused on the sector, since January 1993, we stand out for the wide range of solutions that we can provide. Sunon has professional collaborators from various sectors, such as: architects, engineers, window manufacturers, curtain wall manufacturers and builders who provide the right systems for the execution of the project; our company is recognized for the quality of its work.

We ensure that in each project we eliminate any type of openings and gaps, in addition to providing both a high design facade, comfortable, energy-saving, energy and environmentally friendly. We are specialized in technical and adjustable shutter systems, with dynamic elements for residential sun protection, facades, security, and tunnel boxes, as well as motorization systems. We also take care of product manufacturing, distribution and installation.

S_ONRO

Sunon is present in all phases of the project. From advice to architects, to customized solutions for any type of renovation.

As a customer, through a virtual test, you can visualize the variety of options according to your project.

We will provide you with a technical and economic study where the total service will be provided, which includes: products, assembly, consulting and after-sales maintenance.

S_ONRO

INTRODUCTION

The modern shape of s_onro® provides security and transparency. This results in a new form of aesthetic. It breathes. It allows light and air into the rooms. Roller shutters and sunshade are in perfect unison.

S_ONRO

LONG-LASTING SHADE ENJOYMENT.

The clear yet simple appearance of s_onro® is the result of a design process that did not end until there was nothing more to leave out. That is obvious from the superb aesthetic. The proof comes in the use, durability, and function.

FEATURES

Once the angle of elevation of the sun exceeds 20° s_onro® does not allow any direct sunlight into the rooms anymore. If darkness is required, then the lamellars are closed up. If there is a desire to maintain contact with the outside world, then the s_onro® can be raised individually to exactly the level of light that is desired.
